

Do You Have Sticky Drawers?

Drawers in your cabinets, hutches, and sideboards that are difficult to slide in and out?

If they are wood rails and slides, use a little paraffin wax on them. Same as those cheap white candle sticks. It's cheap stuff and works wonders! Find it at the dollar store!

For drawers that have roller or ball bearing, a little 3 in 1 Oil works wonders. Just a drop on each slide or bearing goes a long way!

Your drawers will be sliding smooth in no time!
